Crow Bar

Technical data :

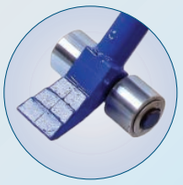

Rod length	: 2000 mm
Length of the lower mounting	: 130 mm
Lifting capacity	: 1500 kg
Aluminium castor diameter	: 70 mm each
Max. lifting height	: 110 mm
Base width	: 80 mm
Total width with castors	: 200 mm
Weight	: 15 kg
Shipping weight	: 71 kg

Code	Length	Size	kg
M450-03	1.5 Mtr	3T	6.50
M450-05	1.5 Mtr	5T	12

Conventional crowbars are short, and they're difficult to get under low pallets without unnecessary bending. This heavy duty Roller Crowbar can lift 5 tonne, equipped with two wheels at the base. The wheels sit below the slopped end, for sliding under pallets or objects close to the floor. For added leverage, the bar is 1.5mt long, this creates a longer arm attached to the fulcrum. With a longer arm, the crowbar can lift heavier weights with less required force. Roller Crowbars, such as this, are often used to lift pallets for attaching roller skids.

Rolling Head with Aligning Pin Set

Material CR-Steel

Code	Length mm	kg
460-K4C	150	0.100
	300	0.200
	400	0.500
	500	0.800

- MAKE ENGINE AND MACHINE WORK EASY : When you need extra leverage when moving heavy machines in tight spaces, the foot Rolling Head Set of 4 Pry Bar Tool 6" 12", 16" 20" Aligning Automotive Machines & Matching Always Comes in handy
- DUAL / DUO ENDS : The Lady Slipper Foot (Rolling Head/Hook) end is for extra leverage when lifting and matching, the tapered (Pointed) end is for aligning sheets and parts.
- VARIETY OF TASKS : You to line up subframes with the premature end, in position bolt holes on two separate elements, pull seals, bushings and stubborn pieces in place, press & move in heavy equipment.
- BUILT TO LAST : Made from drop forged, heat treated steel for extra strength you can get on; resists bending and breaking.

Pry Bar Set

Code	Size	kg
460-K4B	8", 12", 18", 24"	1.250

- 4 piece pry bar set - 8" 12" 18" and 24"
- Comfortable and long handle with build-in strike cap allows pry bar to be hit with a hammer
- Hardened and tempered for strength and durability
- Blackened finish chrome vanadium steel shafts that won't easily flex
- Heavy duty design
